No.: 70.452.22.11816.01 Dated: 2022-08-25

Applicant:	POLYGROUP PACIFIC LTD
Address:	UNIT 606, 6TH FLOOR, FAIRMONT HOUSE, 8 COTTON TREE DRIVE, CENTRAL,
	HONG KONG
Product Name/ Item No.:	8FT Summer Waves® Quick Set® Ring Pool/ P1000826*
Reference Name/ Item No.:	6FT Summer Waves® Quick Set® Ring Pool/ P1000620*
	7FT Summer Waves® Quick Set® Ring Pool/P1000720*
	7FT Summer Waves® Quick Set® Ring Pool/ P1000726*
	8FT Summer Waves® Quick Set® Ring Pool/P1000830*
	10FT Summer Waves® Quick Set® Ring Pool/ P1001030*
	12FT Summer Waves® Quick Set® Ring Pool/ P1001230*
	(*= Refers to the composition of the swimming pool kit. It can be 0-9 or A-Z.)
Country of Origin:	China
Receipt Date of Sample:	2022-07-19, 2022-08-10
Date of Testing:	2022-07-19 to 2022-08-22
Sample Submitted:	The sample(s) was (were) submitted by applicant and identified.
Test Result:	Refer to the data listed in following pages

Test	Item	Conclusion
1.	Polycyclic Aromatic Hydrocarbons (PAHs) Content in Annex XVII item 50 of the REACH Regulation (EC) No 1907/2006 with its Amendments	Pass
2.	Total Cadmium Content Requirement in Annex XVII, Item 23 of the REACH Regulation(EC) No 1907/2006 with its Amendments	Pass
3.	Total Lead Content Requirement in Annex XVII, Item 63 of the REACH Regulation (EC) No 1907/2006 with its Amendments	Pass
4.	Phthalates Content	Pass
5.	Alkanes C10-C13, chloro (short-chain chlorinated paraffins) (SCCPs) Content - European Parliament and Council Regulation (EU) 2019/1021 on Persistent Organic Pollutants (POPs)	Pass
6.	Screening of 224 Substances of Very High Concern (SVHC) published by European Chemicals Agency (ECHA) based on Regulation (EC) No.1907/2006 (REACH)	<0.1%(W/W)
	Screening of 1 Substances of Public Consultation List of potential Substances of Very High Concern (SVHC) published by European Chemicals Agency (ECHA) based on Regulation (EC) No 1907/2006 concerning the REACH.	
7.	Organotin Content Requirement in Annex XVII, Item 20 of the REACH Regulation(EC) No 1907/2006 with its Amendments	Pass
8.	BS EN 16927:2017 Mini-pools - Specific requirements including safety and test methods for mini-pools	Pass

No.: 70.452.22.11816.01 Dated: 2022-08-25

- Remarks: 1. MDL = Method Detection Limit
 - 2. ND = Not Detected (<MDL)
 - 3. <= Less than
 - 4. 1 mg/kg = 1 ppm = 0.0001%

TÜV SÜD Certification and Testing (China) Co.,Ltd. Shanghai Branch Testing Center

Prepared by:

Jenny Yao Technical Engineer

Note:

- Authorized by:
- - conditions ; TCN: https://www.tuvsud.com/zh-tw/terms-and-conditions---en ; SCN: https://www.tuvsud.cn/zh-cn/terms
- (2) The results relate only to the Items tested.
- (3) The test report shall not be reproduced except in full without the written approval of the laboratory
- (4) Disclaimer Measurement Uncertainty:

Unless otherwise agreed upon, Pass or Fail verdicts are given based on the measured values without any considerations of measurement uncertainties.

Please note, every test method has a measurement uncertainty which has been evaluated by the laboratory according to ISO/IEC 17025 requirements. By taking measurement uncertainties into account it might happen that measured values can neither be assessed as Pass nor as Fail.

No.: 70.452.22.11816.01 Dated: 2022-08-25

Description of the Tested Subject

Sample	Description	Photo
A	8FT Summer Waves® Quick Set® Ring Pool (P10008260)	SUMMER VIEWES

T. No	Sample	Description
T1	002	Light blue soft plastic (bottom)
T2	003	Blue soft plastic with white coating (body)
T3	004	Dark blue soft plastic (binding)
T4	005	Transparent soft plastic (valve)
T5	006	Black soft plastic (filling pipe)
T6	007	Black plastic (stopper filling pipe)
T7	008	Light grey plastic (valve)
T8	009	Light grey soft plastic (valve)
Т9	010	Black soft plastic washer (in valve)
T10	011	Transparent soft plastic (repair stick)

Note: Electronic version of the instruction and packaging for ladder was provided by the applicant for evaluation. Only English version was evaluated in this report.

No.: 70.452.22.11816.01 Dated: 2022-08-25

Test Results

1. Polycyclic Aromatic Hydrocarbons (PAHs) Content in Annex XVII item 50 of the REACH Regulation (EC) No 1907/2006 with its Amendments

Test with reference to AfPS GS 2019:01, determination by GC-MS.

Parameter	CAS No.	l Init	MDL	Limit	Result(s)

6. Screening of 224 Substances of Very High Concern (SVHC) published by European Chemicals Agency (ECHA) based on Regulation (EC) No.1907/2006 (REACH)

Screening of 1 Substances of Public Consultation List of potential Substances of Very High Concern (SVHC) published by European Chemicals Agency (ECHA) based on Regulation (EC) No 1907/2006 concerning the REACH.

Test with reference to in house method, determination by ICP, UV-VIS, GC-MS and LC-MS.

ltem No.	Tested Items	CAS No.		Concentration [% w/w] 002+003+004+005+0 06+007+008+009+01 0+011	
-	All tested SVHC in candidate list	-	0.01	<0.01	-
	Resorcinol	108-46-3	0.01	<0.01	Endocrine disrupting properties (Article 57(f) - human health)

Remark:

- 1. The table above only shows detected SVHC, and SVHC that below MDL are not reported. Please refer to Appendix for the full list of tested SVHC.
- 2. ** The substances are tested in terms of its respective elements and the test result is based on the calculation of selected elements/marker(s) and to the worst-case scenario. Calculated concentration of boric and arsenic compounds are based on the water extractive boron and arsenic. Due to the limit of the analytical technology available, any further investigation is not feasible. The client is strongly advised to review the chemical formulation to ascertain.
- 3. ## The substances are UVCB(substance of unknown or variable composition, complex reaction products or biological materials), which are identified by it main constituents. Individual concentrations to the constituent of UVCB with an amount of <0.01% were not considered by the calculation of the sum. Calculation is based on the worst-case scenario. Due to the UVCB nature the reported values may be regarded as semi-quantitative.
- 4. [#] only applicable with \geq 0.1% of Michler's ketone (CAS No. 90-94-8) or Michler's base (CAS No. 101-61-1)
- 5. TGIC is a mixture and also contains β -TGIC. According to ECHA's technical dossier the ratio of β -TGIC to TGIC is around 1 to 10. Therefore β -TGIC is issued based on the above-mentioned ratio.
- 6. The analysis of **224** SVHC and **1** public consultation list are done by currently available test & screening techniques against the SVHC candidate list published by European Chemical Agency (ECHA). Refer to http://echa.europa.eu/chem_data/candidate_list_table_en.asp for details.
- 7. In accordance with Regulation(EC) No 1907/2006, any producer or importer of substances, preparations and articles shall notify ECHA, in accordance with paragraph 4 of Article 7, if a substance meets the criteria in Article 57 and is identified in accordance with Article 59(1), if both the following conditions are met:
 - (a) The substance is present in those articles in quantities totalling over 1 tonne per producer or importer per year;
 - (b) The substance is present in those articles above a concentration of 0.1% weight by weight (w/w).
- 8. From 28 October 2008, EU & EEA suppliers whose goods contain substances on the Candidate List in a concentration above 0.1%(w/w) must provide sufficient information to their customers and on request to a consumer within 45 days of the receipt of this request. This information must ensure safe use of the article and, as a minimum, include the name of the substance.

8. BS EN 16927:2017 Mini pools - Specific requirements including safety and test methods for mini pools

Clause	Requirements	Result	Verdic
4	General requirements and test methods		
4.1	General		
	When installed according to the installation and maintenance manual and during	Complied	Р
	use, the mini-pool shall meet the requirements of this document.		
	When a membrane is used as a watertight system, it is not mandatory to have a		
	minimum thickness, as long as the mini-pools structure passes the performance		
	requirements specified in 4.2 to 4.5.		
	All the tests are performed on the same sample.		
4.2	Mini-pools with frame-supported walls and rigid walls		
4.2.1	Resistance to horizontal deformation		
	On completion of the test defined in 4.2.1.2, the mini-pool shall not collapse or	Self-	NA
	suffer any permanent deformation affecting its structural integrity (e.g. creating	stabilizing	
	sharp edges, visual breakings, etc.).	walls	
1.2.2	Resistance to vertical deformation		
	On completion of the test defined in 4.2.2.2, the mini-pool shall not collapse or	Self-	NA
	suffer any permanent deformation affecting its structural integrity (e.g. creating	stabilizing	
	sharp edges, visual breakings, etc.).	walls	
4.2.3	Bursting strength		1
	The bursting strength test defined in 4.2.3.3 is performed after carrying out the	Self-	NA
	resistance tests for horizontal deformation (4.2.1.2) and vertical deformation	stabilizing	
	(4.2.2.2).	walls	
	On completion of the test defined in 4.2.3.3, the pool shall not burst and shall not		
	suffer any permanent deformation affecting the product's resistance.		
4.3	Mini-pools with self-stabilizing or inflatable walls		L
4.3.1	Capacity to stop an overflow		
	On completion of the tests described in 4.3.1.2 and in 4.3.1.3, the mini-pool shall	Complied	Р
	not collapse and lose its water retention capability.	Complica	
	not condpact and lose no water retention capability.		
	Mini-pool overflow		
	 Install the mini-pool, according to the manufacturer's instructions, on a flat 		
	horizontal ground (maximum slope allowed is 5 mm/m);		
	— Fill the mini-pool until it overflows with a flow rate of 2,5 m3/h minimum and		
	allow it to overflow for 1 min.		
	Behaviour test of the wall under load		
	— Fill the mini-pool with water to the maximum filling level recommended by the		
	manufacturer.		
	- Place on the tube a 0,50 m long half pipe with a minimum inside diameter of		
	0,25 m ballasted with one 40 kg weight on each side.		
	— Maintain the load for 3 s at the tube's maximum deflection, the weights being		
	liable to touch the ground.		
	- Lift the load up immediately after 3 s making sure that the loading device does		
	not interfere during this operation		
	NOTE In the case of mini-pools fitted with a strut, this test is performed at the		
	most unfavourable point.		
4.3.2	Inflatable compartments		1
	All of the air inlets provided for inflation shall be fitted with caps permanently	Complied	Р
	secured on an accessible part of each inflatable compartment of the mini-pool.	Complied	Г
	Once this part is inflated, the caps located inside the mini-pool shall be able to be		
	Once this part is initiated, the caps located inside the mini-pool shall be able to be		1

Clause	Requirements	Result	Verdict
	pushed back inside the upper part so that they do not protrude from the surface		
	by more than 5 mm.		
	The caps of the inflation ports should not be able to become detached and should		
	be protected against accidental removal. The valves shall be fitted in order to		
	prevent an instantaneous deflation.		
4.3.3	Stability in the event of deflation of the upper tube of mini-pool with self-stabi	-	r
	On completion of the test described in 4.3.3.2, the mini-pool with self-stabilizing walls shall not collapse.	Complied	Р
4.3.4	Bursting strength		
	On completion of the test defined in 4.3.4.2, the mini-pool with self-stabilizing walls shall not burst and shall not present any permanent deformation affecting the product's resistance.	Complied	Р
4.4	Tolerances		
	The indicated dimensions and measurements are given with a tolerance of $\pm 3 \%$ (unless otherwise indicated). Mini-pools with self-stabilizing or inflatable walls commonly have larger acceptable tolerances.	Complied	Р
4.5	Minimum performance requirements for structural materials		
4.5.1	General		
	The structural design and materials shall be in accordance with accepted	Declaration	Р
	structural engineering practices. Selection of materials for the construction of the	was	
	mini-pool shall be conducted under consideration of external influences, including	provided	
	but not limited to temperature, UV, chemicals, etc., when appropriate, that may		
	influence the structural integrity of the material.		
	Any combination of different materials in direct contact with each other shall be		
	compatible and not negatively affect each other's properties or structural integrity.		
	The requirements of this section do not apply to non-structural elements of the		
	mini-pool, including, but not limited to, elements with solely decorative function.		
4.5.2	Specific requirements and testing for corrosion resistance		
4.5.2.1	Metal products		1
	Subject a sample per type of metallic surface (other than aluminium) of the wall, before fitting, to a salt spray for 96 h in accordance with EN ISO 9227. At the end of the test, evaluate the results obtained by reference to the requirements of EN ISO 4628-3. The number of rust specks on the surface should conform to class RI 1 or lower.	No Metal	NA
4.5.2.2	Wood		
	Structural elements made of wood or wood-based material shall meet the	No Wood	NA
	following requirements according to EN 335:		
	 use class 3 if they are not in direct contact with ground and / or fresh water 		
	 use class 4 if they are in direct contact with ground and / or fresh water 		
	Compatible woods may be chosen according to two distinct approaches:		
	 using naturally durable woods (excluding sapwood) as defined in EN 350, that 		
	meet the requirements for use in applicable hazard classes in EN 460.		
	 using wood with conferred durability (preservation treatments while conserving 		
	the sapwood), that meets the requirements for use in applicable hazard classes in EN 351-1.		
4.6	Injury risks		
4.6.1	Small elements, edges and corners		

Clause	Requirements	Result	Verdict
	When the mini-pool is being used, any protrusion on accessible parts liable to	Compiled	Р
	present a risk of injury shall be protected by a method which in order to be		
	removed, requires the use of a tool or a minimum amount of force of 60 N, with an		
	accuracy of 2 N.		
	During the installation, equipment made of wood, fibreglass, or other materials		
	shall be free of splinters.		
	Small accessible and grippable elements shall not fully enter into the template or		
	they shall be fixed to the item to which they belong such that they cannot be		
	detached under a force of 60 N, with an accuracy of 2 N, applied in any direction		
	whatsoever.		
	All edges, protruding parts and corners accessible without use of tools or		
	minimum amount of force of 60 N (\pm 2 N) shall be designed not to cause any		
	injury. When necessary they shall be treated appropriately to remove this risk.		
4.6.2	Permissible openings		
4.6.2.1	Principle		
	To prevent entrapment hazards inside the pool structure, accessible openings	See below	Р
	with the lowest point located beyond 500 mm below the maximum water level	000 001011	•
	recommended by the manufacturer shall be restricted to the range of opening or		
	gap size dimensions specified in 4.6.2.2 to 4.6.2.3, unless specifically permitted in		
	other clauses/annexes of this standard and/or parts of this standard series.		
	If the depth of penetration is less than 10mm, no requirements apply.		
4.6.2.2	Finger and toe entrapment		
+. 0. Z.Z	Where there is a risk of finger or toe entrapment, the permissible opening shall be	Complied	Р
		Complied	Р
	\leq 8 mm or \geq 25 mm.		
4.6.2.3	Head and neck entrapment		
	Where there is a risk of head or neck entrapment, the permissible opening shall	Complied	Р
	be ≤ 110 mm or ≥ 230 mm.		
	Where an opening is \geq 230 mm it should not permit passage to further		
	entrapment hazards.		
	Where there is a combination of risks, the lesser of the permitted opening sizes		
	shall be used.		
4.6.2.4	Other body entrapment		
	Other permissible openings include the range between 25 mm and 110 mm.	Complied	Р
	When such openings are necessary for the functionality of the mini-pool or its		
	specific features, the manufacturer shall provide the proper safety instructions for		
	safe operation of such feature and alert the consumer of potential risk of		
	entrapment when applicable.		
4.7	Accessibility		
	The mini-pools being lower than 850 mm wall height can be accessed relatively	No specific	Р
	easily therefore constant adult supervision of children is imperative and the only	means of	
	reliable method of ensuring children safety.	access is	
	The risk of drowning is reasonably foreseeable and especially high for children	used and	
	under 5 years.	adult	
	Accordingly, it is necessary for the adult supervisor to keep the children under	supervisor	
	competent supervision at all times.	was	
	Furthermore keep a telephone or a means of communication near the pool in	recommend	
	order to be able to call the emergency services.	ed.	
	Even when the pool is not in use, the following actions shall be considered:		
	- make the mini-pool inaccessible if possible (e.g. lock doors, windows and		
	access paths to the mini-pool);		
	and/or		
	— install a protection device; and/or		
	ompty the mini peol		
	 empty the mini-pool. If a specific means of access is used (e.g. ladder) such means of access shall 		

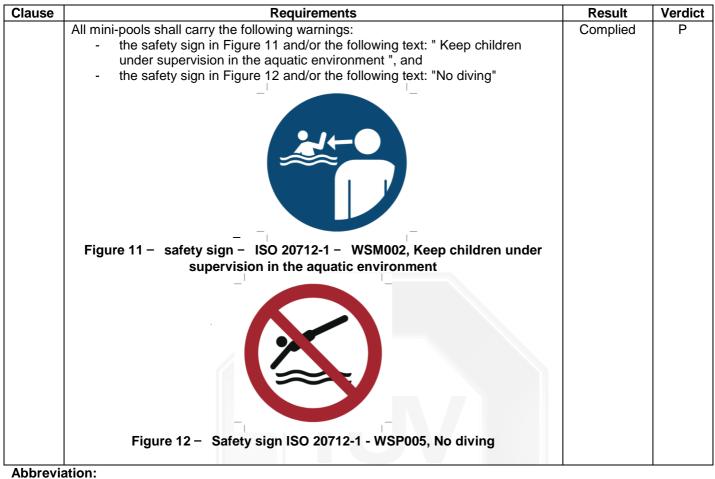

Clause	Requirements	Result	Verdict				
	comply with requirements for safe means of access specified in EN 16582-						
	1:2015, 5.4.4.						
5	Instructions for the consumer
