

# TERRANOVO

## POTTING SOIL FOR GENERAL USE

This general purpose potting soil contains peat, cocopeat, 100% green compost and is enriched with fertiliser which lasts for about 8 weeks. This mixture guarantees full plant growth. It also contains perlite to ensure the oxygenation of the root system in order to avoid septiceimia in the pot.

### IT'S GOOD FOR:

Use this special soil to transplant plants into pots, potting sheds or your garden without any addition of other admixtures. Its natural properties ensure fast and secure plant growth for a long period of time.

## TECHNICAL SHEET

### CHARACTERISTICS

Electrical conductivity **40mS/m (+/-25%)**  
pH **5,5-6,5**
