

UNIVERSAL

POTTING SOIL FOR GENERAL USE

Special potting soil made of blond -black peat mixture, 100% green compost and cocopeat, ideal for indoor and outdoor plants as it is enriched with fertiliser, micro elements and calcium carbonate in an absolute homogeneous way for the ideal growth of your plants.

IT'S GOOD FOR:

Ideal for the transplanting of your plants in a pot, window box or in the garden without any admixture. Its natural properties help plants growth quickly and safely for a long lifecycle.
